

### **bioinformatics workflows using grid pdf**

bioinformatics workflows using grid pdf A workflow management system (WfMS) is a software system for setting up, performing, and monitoring of a defined sequence of processes and tasks, with the broad goals ...

### **bioinformatics workflows using grid pdf - old.sime.nu**

Workflows are very common in bioinformatics because they allow the elaboration of data by delegating the resources management to the information streaming. By the composition of different analysis ...

### **(PDF) Bioinformatics Workflow using ASSIST on GRID**

A possible solution to define workflows, that exploit the power of the computational grid and allow the Web Services integration, is the use of a stream oriented programming language like ASSIST to design graph of tasks activated directly by the data flow.

### **Bioinformatics Workflow using ASSIST on GRID - nettab.org**

With Bio-UnaGrid, bioinformatics workflows are easily created and executed, with a simple click and in a transparent manner, on different cluster and grid computing infrastructures (line command ...

Using multiple Grid Resources for Bioinformatics Applications in GADU Dinanath Sulakhe<sup>1</sup> Alex Rodriguez<sup>1</sup> Michael Wilde<sup>1</sup> Ian Foster<sup>1,2</sup> Natalia Maltsev<sup>1</sup> <sup>1</sup>Mathematics and Computer Science Division, Argonne National Laboratory, Argonne, IL 60439, USA, <sup>2</sup>Department of Computer Science, University of Chicago, Chicago, IL 60637, USA Abstract During the past decade, the scientific community has

### **Using multiple Grid Resources for Bioinformatics**

bioinformatics workflow using Web Services. Who, what, when, where, how of bioinformatics workflows in myGrid Workflows for in-silico experimentaion MyGrid aims to assist the scientist with the development and execution of in-silico experiments. These experiments allow the ...

### **Experiences with eScience workflow specification and**

Data-aware optimization of bioinformatics workflows in hybrid clouds Athanassios M. Kintsakis\*, Fotis E. Psomopoulos and Pericles A. Mitkas Introduction There is no doubt that Life Sciences have been firmly established as a Big Data science

### **Data-aware optimization of bioinformatics workflows in**

BMC Bioinformatics Software Open Access Wildfire: distributed, Grid-enabled workflow construction and execution Francis Tang<sup>1</sup>, Ching Lian Chua<sup>2</sup>, Liang-Yoong Ho<sup>1</sup>, Yun Ping Lim<sup>3</sup>, Praveen Issac<sup>4</sup> and Arun Krishnan<sup>\*1</sup> ... which allows users to construct workflows using a drawing analogy. Wildfire executes the workflow by exporting it as a GEL

### **BMC Bioinformatics BioMed Central**

Therefore, many efforts have been made towards the development of workflow management systems for Grid computing. In this paper, we propose a taxonomy that characterizes and classifies various approaches for building and executing workflows on Grids.

### **A Taxonomy of Workflow Management Systems for Grid**

Interoperability of GADU in using Heterogeneous Grid Resources for Bioinformatics Applications. Dinanath

Sulakhe<sup>1</sup> Alex Rodriguez<sup>2</sup> Michael Wilde<sup>1, 2</sup> Ian Foster<sup>1, 2</sup> Natalia Maltsev<sup>1, 2</sup> <sup>1</sup> Computation Institute, University of Chicago, Chicago, IL 60637, USA <sup>2</sup> Mathematics and Computer Science Division, Argonne National Laboratory, Argonne, IL 60439, USA ...

### **Interoperability of GADU in using Heterogeneous Grid**

Summary: The Sun Grid Engine (SGE) high-performance computing batch queueing system is commonly used in bioinformatics analysis. Creating re-usable scripts for the SGE is a common challenge. Creating re-usable scripts for the SGE is a common challenge.

### **qsubsec: a lightweight template system for defining sun**

<sup>1</sup> A Taxonomy of Workflow Management Systems for Grid Computing Jia Yu and Rajkumar Buyya<sup>1</sup> Grid Computing and Distributed Systems (GRIDS) Laboratory Department of Computer Science and Software Engineering

### **A Taxonomy of Workflow Management Systems for Grid Computing**

Global Grid Forum [22], believes bioinformatics requirements can be satisfied by Grid services and standards, and is interested in what new services Grids should provide to bioinformatics applications.

### **Ontology-based Design of Bioinformatics Workflows on PROTEUS**

A bioinformatics workflow management system is a specialized form of workflow management system designed specifically to compose and execute a series of computational or data manipulation steps, or a workflow, that relate to bioinformatics. There are currently many different workflow systems.

### **Bioinformatics workflow management system - Wikipedia**

Different workflow engines represent workflows using a different format. It follows that conversion of edges is an effort that heavily depends on the involved workflow engines. Analog to the need of a platform-independent representation of vertices, a first step of workflow interoperability, which is our end target, is the development of a ...
