Medical abortions are those induced by abortifacient pharmaceuticals. Medical abortion became an alternative method of abortion with the availability of prostaglandin analogs in the 1970s and the antiprogesterone mifepristone (also known as RU-486) in the 1980s.. The most common early first-trimester medical abortion regimens use mifepristone in combination with a prostaglandin analog ...

Florence Nightingale laid the foundations of professional nursing after the Crimean War. Her Notes on Nursing (1859) became popular. The Nightingale model of professional education, having set up the first school of nursing that is connected to a continuously operating hospital and medical school, spread widely in Europe and North America after 1870. ...

Surgical site infections (SSIs) are among the most preventable health-care-associated infections and are a

substantial burden to health-care systems and service payers worldwide in terms of patient morbidity, mortality, and additional costs. SSI prevention is complex and requires the integration of a range of measures before, during, and after surgery.
