Operations research, or operational research in British usage, is a discipline that deals with the application of advanced analytical methods to help make better decisions. Further, the term 'operational analysis' is used in the British (and some British Commonwealth) military as an intrinsic part of capability development, management and assurance.

Modeling and simulation (M&S) at simple terms is a substitute for physical experimentation, in which computers are used to compute the results of some physical phenomenon.As it is apparent from its name "Modeling and simulation" firstly a computer is used to build a mathematical model which contains all the

Data-Driven Reservoir Modeling introduces new technology and protocols (intelligent systems) that teach the reader how to apply data analytics to solve real-world, reservoir engineering problems. The book describes how to utilize machine-learning-based algorithmic protocols to reduce large quantities of difficult-to-understand data down to actionable, tractable quantities.
