Would you give me a hint about how to update the code in order to add all the images into the exported pdf? imagePathsList contains all the paths of images that that I want to add into a single pdf. Best Regards, Aurelian

Add multiple images into a single pdf file with iText

I managed to reduce the size of the postscript by reusing the eps image. However, this has no effect on the size of the PDF the distill server creates: the distiller simply copies the image back on each page again. I read there is a PDF feature called 'form xobjects' by which this problem can be tackled.
