Extreme pressure additives, or EP additives, are additives for lubricants with a role to decrease wear of the parts of the gears exposed to very high pressures. They are also added to cutting fluids for machining of metals.. Extreme pressure additives are usually used in applications such as gearboxes, while antiwear additives are used with lighter load applications such as hydraulic and ...

Gear oil is a lubricant made specifically for transmissions, transfer cases, and differentials in automobiles, trucks, and other machinery. It is of a high viscosity and usually contains organosulfur compounds. Some modern automatic transaxles (integrated transmission and differential) do not use a heavy oil at all but lubricate with the lower viscosity hydraulic fluid, which is available at ...

Gli antici greci e romani usavano l'allume (che era prodotto dalla lavorazione dell'alunite, un solfato d'alluminio che si trova in natura), per costruire statue, armi e armature.. L'allume era fondamentale nell'industria tessile come fissatore per colori, per le stampe su pergamena, per la concia delle pelli, la produzione del vetro e, come emostatico, per curare le ferite.
