

virtual reality and augmented pdf

Augmented reality (AR) is an interactive experience of a real-world environment where the objects that reside in the real-world are "augmented" by computer-generated perceptual information, sometimes across multiple sensory modalities, including visual, auditory, haptic, somatosensory, and olfactory. The overlaid sensory information can be constructive (i.e. additive to the natural environment ...

Augmented reality - Wikipedia

Virtual reality (VR) is an interactive computer-generated experience taking place within a simulated environment. It incorporates mainly auditory and visual feedback, but may also allow other types of sensory feedback like haptic. This immersive environment can be similar to the real world or it can be fantastical.

Virtual reality - Wikipedia

The statistic shows a forecast for the global augmented and virtual reality market size for 2016, 2017, 2018 and 2022. In 2022, the augmented and virtual reality market is expected to reach a ...

Global augmented/virtual reality market size 2016-2022
