The visual cortex of the brain is a part of the cerebral cortex that processes visual information. It is located in the occipital lobe. Visual nerves run straight from the eye to the primary visual cortex to the Visual Association cortex. Visual information coming from the eye goes through the lateral geniculate nucleus in the thalamus and then reaches the visual cortex.

Everybody immediately responds to subject matter in art. A picture of a butterfly and a picture of a snake do not get the same response. In addition to subject matter*, the formal aspects of visual composition are like the grammar of a language. In writing, a story is written with words - subject matter. Like good literature and good poetry is more than words and subject matter, art is more ...
