Overview The menopause is a natural part of ageing for women. The medical definition of the menopause is when a woman has her last period¹. It usually

Guidance on menopause and the - Faculty of Occupational

Menopause is the time in a woman's life when her normal menstrual periods have stopped for at least 12 months and she can no longer become pregnant. Not all women will have laboratory testing, but women with menopausal symptoms who may have premature ovarian failure or who are being evaluated for risk of other health problems, such as osteoporosis, may have one or more lab tests done.

Menopause - Lab Tests Online

Menopause is the time in a woman's life when her period stops. It is a normal part of aging. In the years before and during menopause, the levels of female hormones can go up and down. This can cause symptoms such as hot flashes, night sweats, pain during sex, and vaginal dryness.
